

**Statement from Nigel Cunliffe new data from separate studies in Mexico and Africa on the effectiveness of rotavirus vaccine**

“Vaccines represent the best hope for preventing the severe consequences of rotavirus infection. They are especially critical in impoverished regions where resources and access to urgent medical care may be limited,” said Nigel Cunliffe, reader, Division of Medical Microbiology, University of Liverpool. “The results of the studies in Malawi and South Africa clearly demonstrate the lifesaving benefits of rotavirus vaccines.”
