

Statement from Mickey Chopra on new data from separate studies in Asia and Africa on the safety, efficacy, and potential lifesaving impact of rotavirus vaccines

“Vaccines protecting children from rotavirus are essential to a comprehensive diarrhea control program,” said Dr. Mickey Chopra, chief of health and associate director of programs at UNICEF. “The global health community has the knowledge and solutions to treat and prevent many of the lethal causes of diarrhea, like rotavirus, and we must act immediately to stop needless child deaths.”
