

Statement from Dr. Julian Lob-Levyt on new data from separate studies in Mexico and Africa on the effectiveness of rotavirus vaccine

“We are heartened by the rotavirus vaccine study findings in Mexico and Africa. The GAVI Alliance was established ten years ago to help developing countries introduce life-saving vaccines by providing the necessary evidence and financial support. These findings will help countries make informed decisions. GAVI looks forward to working with our donors and developing countries in preparing for the introduction of these and other life-saving vaccines.”
