

IN GLOBAL HEALTH, **MARKETS MATTER**

Even the most effective health products can't improve health or save lives if they don't reach the people who need them.

HEALTHY MARKETS REQUIRE THE COORDINATED EFFORTS OF:

HEALTHY MARKETS MEAN PRODUCTS ARE:

- ✓ **Available**
Products can be consistently accessed through a range of local channels and outlets.
- ✓ **Affordable**
Products are offered at a cost that balances what consumers can afford while providing financial incentives for manufacturers and suppliers.
- ✓ **Appropriate**
Products are designed to meet the needs and constraints of users, providers, and supply chain managers.
- ✓ **Quality Assured**
Products are safe, effective, and meet international standards, and quality is safeguarded throughout the supply chain.
- ✓ **In Secure Supply**
Global supply is diversified among manufacturers and suppliers and sufficient to meet demand.

Healthy markets support healthy people. #MarketsMatter | sites.path.org/advocacyandpolicy
