

How we work

PATH is unique in our ability to work across the spectrum, from research and development to delivery of lifesaving solutions at scale. We specialize in breaking through barriers that can keep those solutions from reaching the people who need them.

We test and refine health innovations; seek policy changes and regulatory approvals to pave the way for their use; and work with partners on commercialization, market development, and introduction in low-resource settings.

Our global presence

Africa DR Congo, Ethiopia, Ghana, Kenya, Mozambique, Senegal, South Africa, Tanzania, Uganda, Zambia

Asia Bangladesh, China, India, Myanmar, Vietnam

Europe Belgium, Switzerland, Ukraine

Latin America Peru

North America United States (headquarters in Seattle, Washington)

PATH offices as of December 2014

Our impact

PATH and our partners develop health solutions with global impact, including:

- **Groundbreaking advances in malaria:**
A promising vaccine candidate, a new source of the top malaria treatment, and new strategies to defeat the disease.
- **Landmark protection for children:**
Vaccines for Japanese encephalitis and meningitis A that have reached 350 million+ people in Asia and Africa.
- **New contraceptive options for women:**
An injectable contraceptive available in Africa and a one-size-fits-most diaphragm.
- **Game-changing diagnostic tools:**
A new test to combat a leading cause of preventable blindness in Africa.
- **New approaches to drug development:**
A new version of an antiseptic that could save 300,000 babies per year by protecting against newborn infection.
- **Community-based health strategies:**
Innovative approaches that have improved care for millions of people in Kenya and the Democratic Republic of the Congo.

Leading innovation in global health

Welcome

PATH is driven by an unshakeable commitment to health equity and a bold belief in the power of innovation to improve health and save lives.

By accelerating innovation, PATH and our partners are transforming the lives of the world's most vulnerable women and children. Thank you for sharing our vision.

Who we are

PATH is the leader in global health innovation. An international nonprofit organization, we save lives and improve health, especially among women and children. We accelerate innovation across five platforms—vaccines, drugs, diagnostics, devices, and system and service innovations—that harness our entrepreneurial insight, scientific and public health expertise, and passion for health equity.

By mobilizing partners around the world, we take innovation to scale, working alongside countries primarily in Africa and Asia to tackle their greatest health needs. Together, we deliver measurable results that disrupt the cycle of poor health.

What we do

Our innovation platforms:

Vaccines: A healthy start for children.

Drugs: Power over illness.

Diagnostics: Detecting and tracking disease.

Devices: Tools for better health.

System and service innovations:
The foundation of good health.

PATH envisions
a world where
innovation ensures
that health is within
reach for everyone.
