

Removing unnecessary security warnings from MS Access 2007 when running CCEM

The following setup has to be done for successful functioning of CCEM without being interrupted by security warning:

1. Open CCEM 2
2. Click the Office button top left of MS Access 2007 menus and Click Close Database
3. Click the Office button top left of MS Access 2007 again (see following image)
4. Click Access options on the bottom panel (see following image)

5. Select Trust Center from left menu and click Trust Center Setting bottom right.
6. Select Macro Settings from left menu and select Enable all macro as shown below.

7. Click OK

8. Reopen CCEM 2.accdb or CCEM 2 Practice.accdb
